

## LOOK AS YOUNG AS YOU FEEL

*D*r. Ramtin R. Kassir emphasizes education and a personal approach in achieving excellent, "natural" results. "It is important for patients to be informed consumers, since there are over 2 million cosmetic procedures performed every year in the United States." A double board certified facial plastic surgeon, Dr. Kassir frequently trains other physicians and lectures on a variety of cosmetic and laser procedures. He specializes in minimal incision facial rejuvenation and feels "it is important to have an artistic eye when performing cosmetic surgery." Dr. Kassir was recently chosen as "Surgeon of the World" for Healers of the World Through Jesus Christ- a foundation that organizes medical missions in the Far East.

**AS A TALENTED ARTIST AND SCULPTOR, DR. KASSIR FEELS IT IS IMPORTANT TO HAVE AN ARTISTIC EYE WHEN PERFORMING COSMETIC SURGERY.**

"It is really gratifying to see patients blossom after a procedure- whether a simple Botox® injection for correction of frown lines or a facelift that makes them look twenty years younger. I am thrilled and amazed at the renewed confidence and self-esteem that comes with a smaller nose or a rejuvenated face. A positive attitude, healthy lifestyle, good diet and exercise are essential to long lasting results."

Aesthetic medicine is evolving every day. "The new Bandid Lifts™ and laser lifts are very exciting because they can be performed in as little as two visits, and patients can resume normal activity in a few days." The most common compliment that patients give us is "People tell me I look great but no one knows I've had anything done."

### **Look and Feel Your Best This Summer**

A patient recently told me, "You love what you do, and it shows." My staff and I are passionate about what we do; our goal is to help patients achieve optimal balance through health and beauty.
